Aydah Bespoke Interiors

p 6

Comprehensive consultation + site survey | Construction drawings | Bespoke artisanal design

Procurement services | Full project management | Complete installation + styling

Sacred Spaces

This is a stand alone or add-on feature with any of the other offerings

Energetic diagnosis

Spiritual, divination tools are used to assess the energy readings of a space. This can determine areas of congestion and stagnation where negative / unwanted energies can accumulate. Each room / area is assessed and an overall diagnosis of the space is recorded

Cleansing rituals

The level of cleansing required is determined by the energetic diagnosis. Essential protocols include floor and wall washes (spiritual waters), as well as saining the space and its contents (incense, herbal smoke)

Spatial redesign

The overall layout of the space is refreshed with rearrangement of existing furnishings and minimal new purchases. Choose from our selection of interior design experiences for more in-depth design transformations

Sanctuary Design Essentials

Aydah Signature Interiors

Bespoke Interiors

Sanctuary Design Essentials

A comprehensive client consultation allows for a full understanding of design requirements and expectations. A follow-up meeting explores package options and design details

Inspirational mood boards help to guide the design process, as they portray the design theme for colour, textures and style

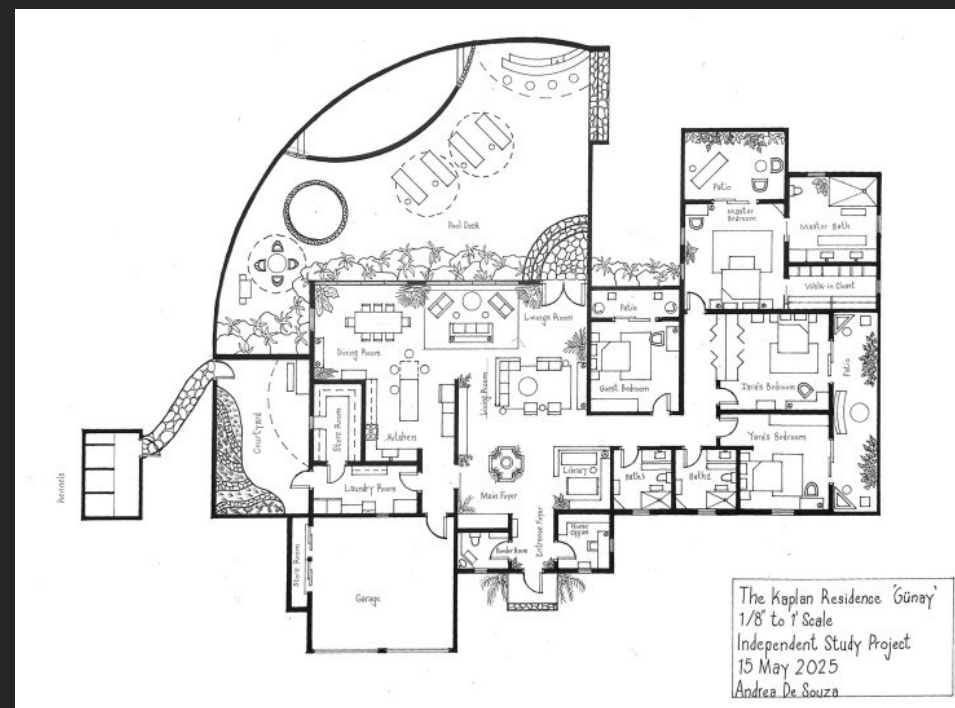

Colour palettes are created for wall and ceiling finishes, as well as for the overall design theme

2D Floor plan shows a proposed spatial design layout within the parameters of the rooms in the space. These are developed from architectural floor plans and/or on-site room measurements

A comprehensive resource guide covers local sources for furnishings, lighting and décor, as well as general guidelines for furnishing placements

Mood board

2D Floor plan

Aydah Signature Interiors

A comprehensive client consultation allows for a full understanding of design requirements and expectations. A follow-up meeting explores package options and design details

Inspirational mood boards help to guide the design process, as they portray the design theme for colour, textures and style

Colour palettes are created for wall and ceiling finishes, as well as for the overall design theme

2D Floor plan shows a proposed spatial design layout within the parameters of the rooms in the space. These are developed from architectural floor plans and/or on-site room measurements. Elevation plans are also included

3D renderings give a more realistic view of the spatial design, as it shows the rooms as they would look in real-time

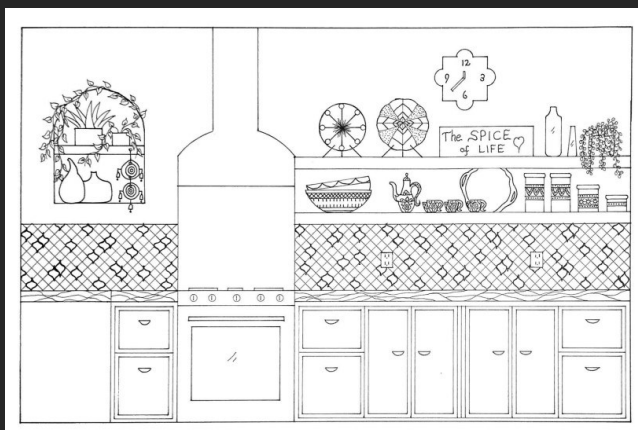

Procurement services include sourcing all materials, furnishings, lighting, décor, etc, and arranging for on-site delivery

Project coordination involves direct communication with vendors, artisans and contractors, and ensuring that the project runs smoothly within the projected timeline

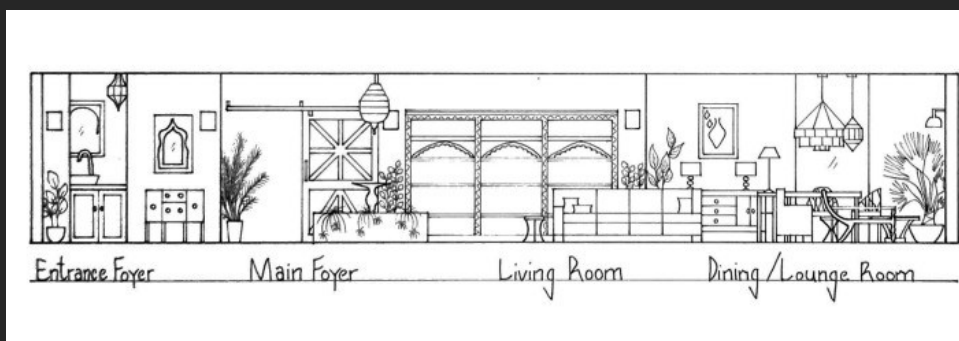

Design implementation guide is a comprehensive manual that details the final placement and styling of furnishings and décor

Site visits will occur during specific phases of the project, as with project coordination and procurement services

Elevation drawing

Cross-section drawing

3D drawing

Aydah Bespoke Interiors
